

RAFAEL ANTUNES

Computer Science and Engineering Student - DevOps & Cloud Infrastructure

Tomar, Portugal | +351 918 962 172 | rafa.oliveiraantunes@gmail.com | linkedin.com
github.com | portfolio

Final-year Computer Science and Engineering student at ISEC – Coimbra, specializing in Networks and Systems Administration. Currently completing a curricular internship in DevOps and platform automation, with hands-on experience across CI/CD pipelines, Kubernetes orchestration, and cloud-native infrastructure. Passionate about cybersecurity, cloud technologies, and building reliable automated systems, with a continuous drive to learn new tools and frameworks.

EDUCATION

Bachelor's Degree in Computer Science and Engineering | ISEC – Instituto Superior de Engenharia de Coimbra
2022 – 2026

- Specialization track in Networks and Systems Administration
- Completing curricular internship as final-year project component

EXPERIENCE

Curricular Intern – DevOps & Platform Automation | OneSource | Coimbra, PT
February 2026 – July 2026

- Develop and maintain CI/CD pipelines for MIRO, a cloud-native, multi-domain Kubernetes orchestration platform
- Contributed to platform automation initiatives, including Grafana chart migration, a dynamic add-on customization feature, and DevSecOps vulnerability scanning
- Refactored a monolithic bootstrap script into modular components and integrate Playwright End-to-End tests into the pipeline

PROJECTS

Virtual Garden Simulator

- Developed a terminal-based ecosystem simulator with dynamic entity interactions
Technologies: C++, CMake, Git

Deployment & Storage Server

- Implemented a PXE server for automated OS deployment and configured TrueNAS for centralized storage management
Technologies: PXE, TrueNAS, VM, Linux, Proxmox VE

Portfolio Website

- Designed and maintained a personal portfolio site built with a modern framework
Technologies: Next.js, TypeScript, Tailwind CSS, HTML, CSS

SKILLS

- Programming: C, C++, JavaScript, HTML/CSS
- Databases: SQL
- DevOps & Cloud: Docker, Kubernetes, Git, GitLab, Helm, Trivy
- Networking: Cisco IOS, pfSense, TrueNAS, Proxmox VE
- Tools & Environments: Linux, Windows Server, Wireshark, GNS3, GitHub, CI/CD

LANGUAGES

Portuguese English Spanish
